FMV InfraSec
CYBERSECURITY & TECHNOLOGY INFRASTRUCTURE

SOFTWARE · SECURITY · INFRASTRUCTURE · AUTOMOTIVE

Andrés Felipe Martínez Obando

Software Engineer and Information Security Specialist

PROFESSIONAL PROFILE

Engineer experienced in external server administration, client support, technical implementation, SQL databases, and information security. I combine software, infrastructure, an active home lab, and hands-on automotive mechatronics experience. Available for remote employment and freelance projects.

TARGET ROLES

Security Analyst · Application Support · Junior/Mid Infrastructure · Technical Virtual Assistant · Remote Automotive Consulting

PROFESSIONAL TRACKS

01 / DIGITAL

Software, security and infrastructure

Windows Server and Linux, application support, SQL, functional testing, documentation, incident management, DevSecOps, and ISO/IEC 27001 ISMS support.

02 / AUTOMOTIVE

Automotive mechatronics and diagnostics

Fault diagnosis, preventive and corrective maintenance, pre-operational inspection, and fleet monitoring. Remote services: guided assistance, maintenance plans, and inspection checklists.

EXPERIENCE

APR. 2024 - NOV. 2026

Network Security Analyst and Consultant · IDAE Soluciones

Responsible for external servers, Windows Server, SQL, client support, implementation, and incident documentation.

2023 - 2024

Mechanical Technician · Consorcio Santa Ana

Heavy machinery supervision and preventive/corrective maintenance management.

2022 - 2023

Productive Development Executive · Bancamía

Financial risk analysis, client acquisition, and portfolio management.

2018 - 2022

Automotive Operations · LAND FAST and others

Pre-operational inspection, fleet maintenance control, fault diagnosis, and automotive maintenance.

CAPABILITIES AND SERVICES

Information security ISMS, risks, SoA, Annex A, and ISO 27001 implementation/audit support.	**Infrastructure and support** Windows Server, Linux, external servers, and operational continuity.
Software and data Requirements, applications, testing, SQL, Python, Java, and COBOL.	**Technical virtual assistance** Documentation, customer support, tracking, and operational organization.
Remote automotive consulting Guided diagnostics, maintenance, inspections, and fleet support.	**Automation and AI** Process optimization and repetitive technology tasks.

TECHNICAL EVIDENCE

External server operations Administration, updates, support, and implementation. Details limited for confidentiality.	**Infrastructure home lab** Nobara, virtual machines, OpenMediaVault, Docker, and Windows Server 2025.

PERSONAL HOME LAB

Nobara server · Virtual machines · OpenMediaVault · Docker · Windows Server 2025

A hands-on environment for learning, experimentation, and validating configurations outside production.

EDUCATION

Specialization in Information Security UNIR · 2026	**Software Engineering** Politécnico Grancolombiano · 2024 · Active professional license
Automotive Mechatronics Maintenance Technology SENA · 2022	**Administrative Assistance Technician** SENA · 2017

CERTIFICATIONS IN PROGRESS

CertiProf: ISO/IEC 27001 Lead Implementer, Internal Auditor, and External Auditor.

LANGUAGES

Native Spanish · English: technical reading

AVAILABILITY

Remote employment and freelance · Full-time, part-time, or hourly · USD 25-40/h depending on scope.
